Creating the future – the Exide way:

Innovation

Reliability

Sustainability

High Performance

Energy whenever you need it.

Reduced operating costs:

- 3x more lifespan and 2x more available capacity for optimal total cost of ownership, compared to conventional batteries.

Faster recharge:

- Exceptional charge acceptance allowing super-fast charging from any state of charge.

Lightweight:

- 70% lighter compared to conventional batteries.

Heating function:

- Withstands all climatic conditions, hence the range of applications is extended significantly.*

Battery management system (BMS):

- For safe operation and best performance.

Bluetooth connectivity and mobile app:

- All battery parameters available at a glance on your cellphone.*

* where available

Exide Marine & Leisure Equipment Li-Ion Type List

Exide Code	Performances			Dimensions				
	Rated Energy (Wh)	Rated Capacity (Ah)	Nominal Voltage	Box Size	L (mm)	W (mm)	H (mm)	Weight (kg)
EV640	640	50	12.8 V	D31	308	168	211	6.5
EV1250	1250	96	12.8 V	L05	355	176	190	10.7
EV1300	1300	100	12.8 V	D31	308	168	211	11.7
EV1300/24	1300	50	25.6 V	G77	307	170	216	15
EV1600	1600	125	12.8 V	27F	318	165	215	15
