

Batteries for Marine and Leisure

Polarity

The diagram shows the top view of the battery pack with a '+' sign on the left and a '-' sign on the right. The terminals are arranged in a 2x4 grid. The positive terminals are marked with a cross symbol, and the negative terminals are marked with a circle symbol.

Terminal Type

The diagram shows two types of terminals: Positive Terminal and Negative Terminal. The Positive Terminal has a diameter of $\varnothing 17.5$ and a height of 17. The Negative Terminal has a diameter of $\varnothing 15.9$ and a height of 17. The terminal height is 3.8 - 18 UNC for the positive terminal and 5.18 - 18 UNC for the negative terminal.

Hold Down

The diagram shows the hold down mechanism, which consists of a series of small, rectangular components that are used to secure the battery pack to the chassis.
